Kentucky Girls STEM Collaborative Project

What is KGSC?

The **Kentucky Girls STEM Collaborative** brings together organizations and individuals that are committed to informing and motivating girls to pursue careers in science, technology, engineering and mathematics to encourage collaboration and improve inter-program communication.

Goals for 2012-2016

- Strengthen the capacity of girl-serving STEM programs to effectively reach and server underrepresented girls in STEM.
- Maximize K-12 school counselors' access to and use of relevant, high-quality resources that increase awareness of barriers to girls' interest and engagement in STEM.

Project Resources

The **Online Program Directory**, "The Connector," allows programs to share needs, resources, and program contact information to foster collaboration.

Webcasts, Conferences, and Forums will share promising practices in informal learning, evaluation, and assessment.

Mini-grants will be available to girl-serving STEM programs to support collaboration projects.

Czarena Crofcheck, Ph.D., Chair
Biosystems Engineering, University of Kentucky
